HIGHLIGHTS

1400W 2-WAY AMPLIFIER

The Vortex series features 1400W peak Class-D amplifiers, fully controlled by DSP. The processing, thanks to thermal, overload and short-circuit protection systems, guarantees the best performance and maximum stability under any conditions.

24-BIT DSP

The 24-bit DSP allows you to select 5 operating modes (Music, Live, Dj, Speech, Monitor) and adjust the frequency response to suit the environment thanks to the 3-band EQ. The limiter guarantees maximum safety at all times to avoid overloading that could damage the transducers. It is also possible to set delay times, which are extremely useful for aligning the audio system when using many speakers placed at a distance from each other.
