

J4605C

PRO-ARTE NYLON CLASSICAL GUITAR SINGLE STRING, HARD TENSION, FIFTH STRING

Pro-Arte composite strings feature an exclusive multifilament stranded core material which delivers a powerful, but warm tone which lasts 2-3 times longer than traditional classical strings. In addition to three traditional nylon treble strings, each set contains an optional monofilament composite 3rd/G string, which provides greater projection and optimal balance between basses and trebles. All Pro-Arte treble strings are sorted by a sophisticated computer-controlled laser machine which performs diameter/tension measurements and quality checks, ensuring true sounding, precise trebles in every set. The J4605C is the perfect replacement string for the D'Addario EJ46C Pro-Arte Hard Tension classical guitar string set.

PRODUCT DETAILS
