

UP203 UPRIGHT DIGITAL PIANO

The UP203 digital piano is the first model of upright pianos in Medeli's UP series, which has completely evolved in both appearance design and performance compared to all previous models.

It features Medeli's flagship German Grand Piano sound and new Japanese grand piano sounds.

The parameters of the piano sound are editable such as hammer noise or string resonance.

Compatibility with the original PianoToolbox app, a new pedal board that supports half damping and all other features make this digital piano the best choice for professional pianists as well as for semi-professionals and beginners.
