# STRIKING WRAPPED FINISH BIRCH 5 PCS DRUM KIT

Most drum manufacturers offer wrapped kits only on their low end products and lacquer finish only on their pricier sets. Partly because lacquer finishing does take a lot longer -- thus increasing the cost -- whereas wrapping shells can cover a multitude of sins and requires less production time. So, then, why wrap birch shells? We dressed up our 9 ply birch shells with some striking new warpas - not the familiar monochromatic hues of entry level and intermediate kits. The result is a new look to a very substantial kit. Underneath the dazzling sensory color assault, nine ply birch shells provide pro quality warmth, volume, projection. Who said there's nothing new under the sun?
