

BZ-1A

# ACTIVE PIEZO PICKUP BZ-1A FOR BOUZOUKI

Humbucking, soundhole-mount design with active electronics for bouzouki

BZ-1A converts your instrument's natural, resonant tone to a high-fidelity signal ready for an amp or audio mixer.

Neodymium magnets in an active, humbucking design bring a warm, clear, and strong amplified tone with plenty of depth.

BZ-1a offers a balanced output level between strings and installs without blocking the soundhole.

## HIGHLIGHTS

### UNIVERSAL FIT TO ALMOST ANY STEPPED-FINGERBOARD BOUZOUKI

The magnetic part of the pickup was developed to install in practically any bouzouki having a "step"—a flat surface at the end of the fingerboard. The clever design doesn't block the soundhole of the bouzouki and doesn't interfere with its resonance.

### HUMBUCKING, SOUNDHOLE-MOUNT DESIGN WITH ACTIVE ELECTRONICS FOR BOUZOUKI

BZ-1 converts your instrument's natural, resonant tone to a high-fidelity signal ready for an amp or audio mixer.

Neodymium magnets in an active, humbucking design bring a warm, clear, and strong amplified tone with plenty of depth.

BZ-1 offers a balanced output level between strings and installs without blocking the soundhole.

---

## WOODEN HOUSING

The magnetic element is encased in laminated birch with an elegant and stylish black plastic cap. This lightweight assembly achieves maximum tonal sensitivity.

---

## ACTIVE DESIGN

The built-in preamplifier reduces noise and eliminates string grounding. The pre-amp also shapes the tone of the pickup specifically for bouzouki. The pickup requires 2 CR2032 batteries for operation.

---

## NEODYMIUM MAGNETS

BZ-1A utilizes the power of neodymium magnets to provide a warm, clear, and strong amplified tone with plenty of depth.

## NATURAL BALANCED SOUND

BZ-1A offers a balanced output between strings, and captures and reproduces the natural, resonant tone of the bouzouki.

## COMPLETE INSTALLATION SET

The pickup features a single screw mount, a standard of many bouzouki pickups, and a pre-wired output jack.
