

NOD-1 HORSEMAN DUAL OVERDRIVE

One of the most sought-after dual overdrive pedals produced in the mid '90s is now in one unique pedal design-with a pocket size. NUX Horseman pays homage to the legendary Centaur pedal. There are 3 dials for primary settings and 2 modes: Gold and Silver, and it offers massive headway usually requiring an 18v input. Gold Mode mimics its classic predecessor; the transparent Gold Centaur overdrive pedal and the Silver Mode is a powered-up version with an extended gain range (Silver Centaur).
