

GC3-RNW

3" CEILING SPEAKER @ 16 OHM IN-WALL ROUND BIANCO

GCF3W is a tiny but performing 3" 2-way full range passive speaker for in-ceiling or in-wall installation.

Thanks to its circular frameless grille design and its extra small format, GCF3W is a very practical and discrete solution for architectural installations that require multi-point sound distribution.

The spring clamps and the magnetic grille allow fast and tool-free installation and its 16 ohm impedance allows multiple speaker connection to KGEAR amplifiers (GA201, GA41/41L or GA43/43L) without any transformer, preserving audio quality. To obtain the best performance and low frequency extension, combine GCF3W with a KGEAR subwoofer (GS6, GCF8S, GWF8S).

Available in black or white colour, the frameless magnetic grille can be painted to match any environment.

3" CEILING SPEAKER @ 16 OHM IN-WALL ROUND BIANCO

PRODUCT DETAILS

KEY FEATURES

Two-way full-range speaker

Circular Protective Magnetic Grill

Frameless Grill Design

Low impedance 16 ohm

Easy ceiling and in-wall installations

Audio I/O Gold plated push terminal

Practical and discrete solution for architectural installations that require multi-point sound distribution

SPECIFICATIONS

Type Passive Fullrange loudspeaker

Transducers 3" coaxial Woven Glass Fiber woofer with 0,75" Mylar Dome Tweeter

Frequency Response 120Hz-20KHz (-10dB)

Sensibility 90 dB (1w,1mt)

Max.SPL?106 dB (calculated using a signal with crest factor 4 (12dB) measured at 1 mt)

Coverage 130°

Power Handling 20 Watt

Nominal Impedance 16 Ohm

Dimensions (Ø outer [Ø inner] x H)

Minimum required mounting Depth 65 mm (2.5 in)

GC3-RNW
