

HDJ-CUE1 CUFFIE DJ HEADPHONES

Start your DJ journey with HDJ-CUE1 headphones. These styled DJ headphones are built on DNA from our pro models but are available at a much more modest price. While these entry-level cans are our most affordable pair yet, they match many of the feature and quality benchmarks set by our professional headphones range. Choose the HDJ-CUE1 for a pro look and feel, rich sound, compact and flexible design, and high-quality finish. Enjoy specialist sound tuning inherited from the pro-level HDJ-X5; perfectly hear low frequencies in the bass and kick drums so you can mix precisely and know exactly what your friends will hear when you drop the next track. If you're interested in wireless headphones, check out the HDJ-CUE1 Bluetooth models. Including all the same features plus Bluetooth technology that enables you listen and play on the go, they're available in a range of colors to match your individual style.
