

TC-TD-D2

# HANDHELD MICROPHONE FOR TAKSTAR WIRELESS SYSTEM TC-4R

---

TAKSTAR TC-4R is a flexible wireless microphone system able to cover a wide number of applications. The system is modular and the user can select transmitter types according to her/his needs: up to 8 transmitters working at the same time and three different options among handheld mic, bodypack/headset-lavalier, gooseneck conference sets. A combination of the three options is also possible. For example it is possible to setup a system with four handheld mics and four headset/bodypack transmitters or eight conference mics for a meeting room. The two 1U receiver unit TC-4R1 and TC-4R2 can be easily installed in venue standard racks or safely placed on every flat surface thanks to four soft rubber pins. A stable interference free signal and an operating range of 100 meters together with simplicity of use makes this system a safe choice for all kind of performances.
