# 10 X 5 METAL SHELL SERIES STEEL SNARE

---

In an effort to give every drummer an independent voice, the Batterie line of snare drums has always been constructed with variety in mind. True to this principle, 4 all new Auxiliary snare models have been added to the Batterie library of sound. Covering the spectrum that calls for extreme highs, the sharp contrast of these Auxiliary snares meet the loop-laden demands of today's active music. Each model is fitted with our Crescent Suspension Mount for easy reach and infinite positioning.
