

SMON-200

ADJUSTABLE STUDIO MONITOR STAND

SMON-200 is a height-adjustable metal studio monitor stand. The triangular base allows you to save space on the ground, while ensuring maximum stability. Insulation is a fundamental factor in choosing the support. For this reason, conical metal feet are included to place under the base, while the surface on which the monitor rests has two rubber pads. These measures eliminate unwanted vibrations. A professional product but for all budgets.

PRODUCT DETAILS

KEY FEATURES

Steel support with triangular base to reduce the footprint without sacrificing stability

Steel stand with triangular shaped base to reduce the size without compromising stability

Conical metal feet to ensure perfect insulation from the ground

Two rubber bands over the plate to isolate the monitor from the stand

SPECIFICATIONS

Height (min-max)

69 - 130 cm

Dimensions of the monitor support base

23 x 23 cm

Ground base dimensions

45 x 45 x 45 cm
