KEY FEATURES

LUBRI COAT: With a "Solid Luburication Coat", regular oil has been eliminated keeping the lubrication where it is needed for the life of the tuning machine heads. It is now enhanced with a GOTOH original anti-transformable lubrication oil and this reduces the friction between the gears resulting in an ultra smooth feel, minimal back lash and unrivalled tuning stability.

ROCK SOLID: Anchoring system developed by Gotoh that prevents movements outside the central axis of the pin, thereby promoting a greater stability of tuning.
