

NOD-2 TUBEMAN MKII MINI CORE OVERDRIVE

More gain! That was the overall goal with the MKII version of the Tubeman, our most popular overdrive. A designed FET input stage makes Tubeman breakup in a whole new, genuine "Tube-like" style which will make your leads singing and your rhythm playing sounding more dynamic and expressive than ever. It all culminates in an overdrive that is superbly dynamic, with crispness and clarity that let players cut through a dense mix, while retaining the plump mid range.

NOD-2 TUBEMAN MKII

MINI CORE OVERDRIVE
