

M361

61 KEYS ELECTRONIC KEYBOARD WITH TOUCH RESPONSE AND STYLE CREATOR SOFTWARE

M361 helps music enthusiasts to take music creation to the next level. With 653 voices and 240 pre-loaded styles, a style creator software is available at your fingertip. Simply load the software on a PC and connect it with the keyboard, you are free to let your imagination flow. The keyboard records up to 10 six track songs with your creation of melody and accompaniment. Alternatively, the songs could be conveniently stored on a USB device. With performance assistant, playing becomes more interesting. In the piano mode, the performance assistant helps you to perform many difficult skills by providing beautiful phrases to enrich the music. IN the guitar mode, the keyboard will be divided into different parts to control different parameters, providing guitar phrases like strum, broken chord, echoism and endings. Just like playing the real guitar. M361 is a keyboard with versatile function to cater both beginners and experienced music players alike. Another fun feature is the Vocal Effect. Plug in a microphone in the mic jack and a music player in the Aux in, you can then sing along to your favorite music, with effects like Chorus and Reverb are all on board, giving you a whole new experience to explore with your voice.
