

MIGHTY 40 BT MODELING AMPLIFIER FOR ELECTRIC GUITAR 40W

Mighty 40 BT is 40 watt powered amplifier with 4 channels, digital effects, 3-band EQ and tuner. And you can connect any device by Bluetooth for playing along with your favorite music or backing track. You can customize and save your own presets and bring your sound to any stage. You can combine 3 effects simultaneously and use tap tempo to adjust your delay. NUX also developed a mobile free app to control Mighty 40 BT amplifier with your smart phone. You can switch the amp's channels and control the Gain, Level and Tone parameters. Choose any effect you want and adjust the parameters. You can control everything, and there are more functions including some application exclusive features such as a built in drum machine and easy acces to a backing track library for your jam.
