

HYPER 8 STREET BATTERY ACTIVE PORTABLE PA SPEAKER WITH BT CONNECTION

The starting point from which Soundsation drew inspiration for the new Hyper 8 Street portable PA is the desire to make music everywhere you go. You don't want and you don't have to carry large equipment, but you also don't want the sound quality to be compromised.

Hyper 8 Street is an all-in-one solution that integrates an active 2-way coaxial speaker, a 200W class-D amplifier and DSP with 4 presets, a mixer with 2 Mic/Line inputs, 1 Line Stereo input and 1 channel with BT connection. Everything is packed in a sturdy, lightweight cabinet ready for any use (in vertical position on the ground or on a 35mm support, inclined upwards or horizontally like a stage monitor). The 5,400mAh lithium battery ensures a running time of 4 hours. In short, Hyper 8 Street is the answer to the maximum freedom of expression, the desire to be together and to make music outdoors.

HYPER 8 STREET BATTERY ACTIVE PORTABLE PA SPEAKER WITH BT CONNECTION

HIGHLIGHTS

READY-TO-USE SPEAKER WITH PROFESSIONAL DESIGN

When it comes to active speakers, portability very often implies accepting considerable compromises in audio quality and performance. Hyper 8 Street wants to overturn this assumption by maintaining all the main features of an active case for ProAudio applications but enhancing the aspects that belong to the idea of a totally "**Portable**" speaker.

The coaxial transducer with 1" driver is the motor that moves the **Vented** acoustic circuit with **Front Reflex Doors**. The **housing design** is designed for multiple uses (horizontal, vertical, monitor) and the **Class-D** amplifier with **DSP** and 4 presets for equalization is the counterpart to offer 240W of power and 120db of sound pressure safely and with professional quality.

TRUE WIRELESS STEREO

Dual BT connection, as well as allowing audio streaming from devices such as tablets, smartphones, etc., also allows you to connect a second Hyper 8 Street using it as the **Right Channel** of what becomes a real **Stereo Audio System**. In this way, the left channel's 4-input mixer (2 Mic Combo, 1 RCA Line and 1 BT) becomes **Master**

and, thanks to the transmission speed of BT 5.0 technology, the latency between the two speakers is utterly canceled.

HYPER 8 STREET BATTERY ACTIVE PORTABLE PA SPEAKER WITH BT CONNECTION

PRODUCT DETAILS

KEY FEATURES

High versatility (Multipurpose and Compact)

All-in-One System with Mixer, 240W Class-D Power Amplifier, Multiple BT Streaming

Superior Audio Quality thanks to Coaxial Transducers and Vented Design

DSP with 4 Presets to adapt the speaker to the most frequent uses

BT Master/Slave connection with another Hyper 8 Street units for Stereo Systems

Lithium Battery with 4h Capacity

SPECIFICATIONS

Product type	Battery Portable PA Active Speaker
Low/High driver Dimensions	8" + 1" (coaxial)
Amplifier	Class D
RMS/Program Power	120W/240W
Frequency response	50Hz-20kHz
SPL(1W/1m)	95dB
Max. SPL	120dB
Protection circuits	Short circuit overcurrent
Controls	Master, Line Gain, Bass/Treble, Power, Mic Gain
Indicators	Charge/Battery Status, Power
Supported media	2x XLR-6.3mm Jack Combo, RCA, 3.5mm Mini-Jack, BT Audio Streaming

HYPER 8 STREET BATTERY ACTIVE PORTABLE PA SPEAKER WITH BT CONNECTION

Line inputs	3
Line input connectors	RCA, 6.3mm Jack/XLR, 3.5mm Mini-Jack
Mic inputs	XLR/6.3mm Jack Combo
Mix outputs	6.3mm Jack
Operating Voltage	DC 19V - 2500mA (External Power Adapter included)
Battery Capacity	4-hour 100% Power / 7-hour 50% Power / 14.8V-5,400mAh
Cabinet material	Polypropylene
Cabinet construction	Vented
Other features	36mm Pole-Mount Hole, Transport Handle
Dimensions	398 x 338 x 284mm
Speaker Weight	8,3kg
Packing Size	410 x 362 x 515mm
Weight	9.5kg
