# HARMONICA CX-12 TUNING C

Wow!! That's quite a harmonica. The sleek lines of the racy looking 'Jazz', constructed on the basis of the tried and tested CX12, make it a real attentiongrabber. In response to requests from a number of CX12 fans, Hohner made the new mouth-piece design narrower, which some players find suits their embouchure better. The new housing is fully compatible with all other CX12 models and is coated using an Ultraglide multilayer treatment.

## PRODUCT DETAILS

### KEY FEATURES

Jazz Chromatic Harmonica

Tuning: C

Holes: 12

48 reeds

Brass plate

Reed Plate thickness: 1,05 mm

Length: cm 16.8
