# RPS-11 SLINKY NICKEL WOUND

A patented winding of bronze wire is tightly wrapped around the lock twist of the ball end of plain strings. String slippage and breakage are minimized at the ball end where these most often occur. RPS strings last longer and stay in tune better than conventional plain strings.

## PRODUCT DETAILS

### KEY FEATURES

Hybrid

String slippage and breakage are minimized at the ball end

RPS strings last longer and stay in tune better than conventional plain strings
