PARAMOUNT 18.6' ACOUSTIC INSTRUMENT CABLE, BROWN

Designed to complement the rich and earthy undertones found on traditional folk instruments, the Paramount Acoustic Cable is built for premium aesthetic and long-lasting performance. These cables feature custom-molded ends and 24K gold-plated connectors to retain brightness and sound transparency for crystal-clear audio. The mono-crystal copper conductor provides exceptionally high signal transmission performance, allowing for greater purity and strength to deliver tonal clarity. The spiral shield is constructed from oxygen-free copper for maximum durability.
