SPARKLE LACQUERED FINISH NORTH AMERICAN MAPLE 5 PCS DRUM SET

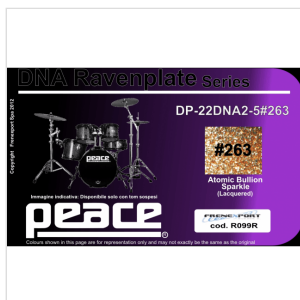

Peace's top-of-the-line package kit, the DNA series resides at the crossroads of rugged and handsome, where professional quality meets affordability. A versatile kit designed to capture the quintessential modern drum set sound, the DNA series combines heavy duty series 800 hardware including both a straight and a boom stand, and 9-ply lacquered North American maple drums in a package that includes rims-mount toms, low-mass lugs, die-cast claws, and brass vents, among many stand-out features. The series is offered with chrome or black-trim hardware, and custom sizes and finishes are also available by special order. It ain't broke, so we didn't fix it. Peace's DNA series has been a preferred choice by artists and endorsers for years, and it's been heralded as "a pro-level kit at a very affordable price" by DRUM! Magazine. Shown in one of Peace's new finishes, black castle, a three color sparkle lacquer finish with a triple sparkle overlay belt that explodes chords of color under stage lighting.
