SET-700 NSE - FLIGHTCASE 2X PIONEER XDJ-700 + 1X 12" MIXER

The sturdy Zomo 700 NSE flightcase has especially been designed to transport or store two Pioneer XDJ 700 in addition to a standard 12" mixer like for example a Pioneer DJM-850 or a Allen & Heath Xone 92. As the Pioneer XDJ 700 mediaplayer has evolved to a price-efficient alternative for the high tier Pioneer models and therefore has become more and more popular amongst Djs, Zomo picked up on this trend and designed a fitting case accordingly. Since this case features a standard 12" mixer, it is ideal to use in the club or on big stages. As usual, Zomo has taken care that the case consists of premium grade materials. The external panelling is constructed of 9mm laminated ply wood, reinforced with sturdy aluminum profiles and nearly indestructible ball corners. The convenient carrying handle allows you to comfortably transport your case. Zomo Set 700 NSE is not only sturdy, but also an eye-catcher because of its sexy black NSE (Night Style Edition) design. Sheer genius and totally cool! It's Zomo! ** The devices in the picture are not included. Please check our shop for separate offers.
