PRO STAND P-3000

The Zomo Pro Stand P-3000 is the suitable equipment support for the Pioneer CDJ-3000. The Pro Stand is the best solution to mount the valuable player space-saving directly above the mixer or above the turntables. The support surface of the P-3000 was exactly adjusted to the Pioneer CDJ-3000, so that it can not slip. The professional Zomo Equipment Console is especially robust and durable.

The Zomo Pro Stand can be adjusted in height and tilt as well as in right-left rotation. In addition, the mounting plate for the player is replaceable and therefore quickly and cheaply adaptable when changing equipment. The Zomo Pro Stand P-3000 is also fully usable when traveling.

The stand can be easily mounted on any table top by means of four screws. The optionally available base plate allows easy mounting e.g. under the turntable without the need for any drilling. The support provides greater protection against movement and more space is created on the DJ booth.
