

NYXL1052

# NICKEL WOUND ELECTRIC GUITAR STRINGS, LIGHT TOP / HEAVY BOTTOM, 10-52

NYXL1052 is a hybrid set, combining the high strings from an regular light set (.010) with heavier low strings (.052). This combination delivers powerful low end for heavy chording and flexible plain steel strings for bending. D'Addario NYXL guitar strings will bend farther, sing louder, and stay in tune better than any string you've played before. Envisioned, perfected, and manufactured by D'Addario in New York, this newly engineered, break-resistant, high-carbon steel core and plain steel alloy delivers a whole new level of freedom, confidence, and power. NYXL's provide more strength and up to 131% greater tuning stability by utilizing a completely reinvented wire drawing process coupled with a revolutionary "fusion twist" process for the plain steels. The reformulated nickel plated string windings have greater magnetic properties resulting in higher output and enhanced mid-range frequency response for more presence and crunch.

## PRODUCT DETAILS

### KEY FEATURES

High carbon steel alloy for unprecedented strength

Improved tuning stability compared to traditional nickel wound strings - get in tune faster, stay in tune better

Wound strings with enhanced mid-range frequency response in the 1 - 3.5 kHz range – more presence and crunch to cut through the mix

Environmentally friendly, corrosion resistant packaging for strings that are always fresh

String Gauges: Plain Steel .010, .013, .017, Nickel Wound .030, .042, .052
