

SD-130B

# 14 X 6,5 BRASS SERIES SNARE

No other shell has a sound quite like Brass. It's immediate response is bright and explosive, yet it's overtone is warm and full. With this in mind, Peace's line of Batterie Brass snares is available in six different size configurations, each representing a different range of sound. The shells are lathed to a 1.2mm thickness. This thinner shell breathes with the vibration of the drum as it is played, producing a sound that is lively, yet focused. Standard Brass, Red Brass, and our new White Brass alloy shells are now available for complete snare drum gratification!.
