

AML-10P

MALLETS FOR GLOCKENSPIEL

Glockenspiel Mallet is a product that was exclusive developed. The stick's front and which is hitting area is composed of two kinds of composite materials. The results in excellent deliverance of sound. The mallets made out of strong plastic materials and thus it never breaks easily and has good elasticity. In addition, as a design to complement sense of grip, the upper part is thin and grip is thick for optimization.
