

SFLD05L

LIGHT DENSITY SMOKE FLUID

SOUNDSATION SFLD05L Low Density Fluid is a water-based smoke fluid compatible with any smoke machine equipped with a heater block. Its density is light and the dissipation is rapid. It is designed to create an extremely light but enveloping smoke. The pale blue color is pleasant and leaves no traces of any kind on clothes or surfaces, while the smoke produced is light white. The scent is neutral and pleasant, and leaves no trace after the dissolution. You can also add one of the many SOUNDSATION fragrances to recreate atmospheres that can range from tropical fruits, flowers and fragrant plants. The SFLD05L is made according to strict production processes and strict controls during all its phases, and meets all the European regulatory requirements. It is available in 5L tanks.
