

NAMM 2017

Welcome to Timber Tones

Since launching at the Frankfurt Musikmesse in 2009 Timber Tones have grown to be the biggest supplier of luxury guitar picks in the world. Today we work with the best distributors in the business, and together we have grown the brand globally making Timber Tones the go to supplier for any type of luxury guitar picks.

With over 400 products, made from 112 materials and focused on the highest quality standards and design, our new and loyal customers enjoy a great product, choice and service every time they buy.

Each Timber Tones pick goes through a rigorous development process involving design innovation, material research, vast customer feedback, sampling and testing for the best quality pick and perfect tone - as expected of the Timber Tones brand. This quality and innovative method is lead by Rob Wooler, our Managing Director.

Rob is a highly qualified and experienced design and manufacturing engineer who's previous successes involved optimising manufacturing processes for large international companies. Mix this knowledge with his 20 year long passion for playing the guitar, especially Vintage Gibsons and you can be confident Timber Tones is the right supplier for the best luxury guitar picks in the world.

Timber Tones - These are the original Timber Tones, they have been our best sellers for the last 8 years and its easy to see why... Based upon the Classic 351 shape, they are CNC Milled from 18 exotic timbers then hand sanded & hand waxed. 2.5mm thick tapering to a precise 0.7mm playing tip making them comfortable to hold. They come in a range of hardnesses making them suitable for use on both Electric Guitar and Acoustic Guitar.

"The original and still the best..."

Zodiac Tones were released by Timber Tones in 2016. They are CNC Milled from the best quality Vietnamese Water Buffalo Horn. Buffalo Horn is made from Keratin, the same material as Tortoise Shell, meaning that these picks are as close as you are going to get to the famous warm tone achieved by Gypsy Jazz stars of the past. Once precision milled they are hand polished then Laser Etched with one of the 12 signs of the Zodiac.

Laser Tones - We start with 4 of our most popular Timber Tones Picks, then we Laser etch 4 Symbols to give a medium level of grip on one side.

Laser Tones Grip - Similar to Laser Tones but this time we have laser etched some patterns on one side for a high level of grip.

Timber Tones Grip - 4 Beautiful timber guitar picks with the Timber Tones logo laser etched on one side.

Bone Tones - These Guitar picks are manufactured to our Classic shape, which is based on the 351 design. They are made from Vietnamese Water Buffalo Bone and 3 colours of Horn. The Bone is hard and bright, ideal for electric guitar. The horn picks are warmer but still hard wearing, recommended for both electric & acoustic guitars.

Grip Tones - We start with our famous Bone Tones guitar picks, then we laser etch a deep 'cross hatch' pattern one side for an extremely grippy surface.

Tribal Tones - These picks are thick and hard. They are made from Black Buffalo Horn and are probably the strongest picks that we make. We recommend these picks for bass, electric guitar and gypsy Jazz.

Funk Tones - These are some of the most comfortable Guitar Picks that we make. they are heavily sculpted and rounded to give an extremely comfortable feel. They have a sharp 'Jazz' tip, a concave detail for the thumb and a right handed scoop for the first finger.

Stub Tones - These are based upon the Funk Tones above, however the playing tip has been heavily rounded to give the feel of a guitar pick that has been played in and worn down. The rounded shape of the tip means that Stub Tones have a very warm tone.

Coconut Husk

Lefty Tones - These Guitar Picks are a cross section of other brands (Funk Tones, Groovy Tones & Stub Tones), the difference is these have a left handed Grip detail on the underside to take the first finger.

Groovy Tones - These Picks are manufactured from 4 beautiful exotic timbers to be extremely comfortable. They have a very sharp "Jazz Tip" for speed and accuracy. They also have a concave detail for the thumb and a right handed groove for the first finger. They are heavily sculpted and shaped for extreme comfort.

Heart Tones - These Picks are manufactured from 4 beautiful exotic timbers to be extremely comfortable. They have a very sharp "Jazz Tip" for speed and accuracy. They also have a double concave detail for the thumb and a right handed groove for the first finger.

Jazz Tones - These picks are based loosely on the famous Jazz III shape. They are 2.2mm thick and have a 45 degree chamfer leading to a sharp and pointed playing tip. Jazz Tones are designed for speed and accuracy.

Jazz Tones Fat - Much thicker than our normal Jazz Tones, these picks are the same shape but 4mm thick. Instead of having a sharp chamfered tip these have a rounded sweeping tip chamfer. The thicker shape makes these easier to hold and puts less stress on the hand muscles.

Grip Tones Mini - These picks are based on our Jazz Tones picks. They have a deep laser etched cross hatch pattern on one side to give a high level of extra grip.

Mineral Picks - We have 40 types of Mineral Guitar Picks over 10 brands. They are all 4mm thick and hand shaped to our Classic 351 Shape. These picks have a heavily rounded playing tip in both axis to ensure that they are hard wearing, however these are very hard materials and as such we only recommend them for picking, not strumming. This rounded playing tip ensures a nice warm tone when playing Jazz Guitar.
